

FurnCIRCLE
**Circular Economy Guidelines
and Tools for Application in
the EU Furniture Sector**

furncircle.eu

Co-funded by
the European Union

FurnCIRCLE tackles the challenge of providing sector companies with practical guidelines and tools to support them to implement their circular transition strategy.

furncircle.eu

FurnCIRCLE expect to generate the following outcomes:

- **a massive survey**, at EU level, for collecting and analysing data about furniture industry circular transition;
- practical and validated **guidelines** to integrate companies existing management models with actions and activities for deploying Circular Economy practices;
- and an **online tool for self-evaluating** their level of maturity and real readiness to deploy Circular Economy practices.

The project will also identify employers' and employees' **green knowledge and skills needed** to successfully implement Circular Economy practices and create a set of **recommendations** for furniture and other sectors stakeholders to foster and support the deployment of these practices.

Implementation period:

01/09/2023 - 31/08/2025
