### FurnCIRCLE Events

#### For Italian speaking audience - Join the Webinar: "Insights FurnCIRCLE 2024 - I Risultati della Survey Europea per le aziende dell'arredo"

How are European furniture companies integrating sustainability into their operations? What are the key trends and challenges shaping the industry's green transition? These questions and more will be answered in an exclusive webinar in Italian language organized by **FederlegnoArredo** on **October 16, 2024, at 3:00 PM**.

This free event will unveil the **results of a Europe-wide survey** conducted in the spring of 2024, which gathered insights from furniture companies across European 12 countries. The survey examined critical topics such as circular economy practices, sustainability management, legislative awareness, and certification adoption. Don't miss the opportunity to learn about **emerging trends, untapped opportunities, and critical challenges** impacting the future of furniture manufacturing.

The final report from the survey will also be presented during the webinar!

**Register now** to secure your spot:

### Other Opportunities

#### Industry 5.0: what we know, what we would like to know. Fill the questionnaire of the new Furn5.0 project!

Industry 5.0 is the new industrial paradigm promoted by the European Union, which puts **people and the environment** at the center of the production process, supported by **4.0 technologies**.

But what are the most impactful technologies in the next three years for the wood-furniture sector? Which ones are best known, and which ones would companies like to invest in?

The questionnaire - very short, of **only 2 questions** - will help the FURN5.0 project set up a specific **Guide for the transition to Industry 5.0**. It is aimed at entrepreneurs and employees of European companies throughout the furniture supply chain.

Respondents will receive the full Report with the **Guide to the Industry 5.0 Transition**.

To fill in the questionnaire: <https://forms.office.com/e/2U7zzjmgXH>
